DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 4, 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Engel (3738117). Engel shows means producing and dispensing at least one first stream of air having a first temperature (5, 6', fig. 1); and means producing and dispensing at least one second stream of air having a second temperature (5, 9, 6'', fig. 1), said means for producing and dispensing said at least one first stream of air is at least one compressor with refrigerated dryer (1, 5, fig. 1), and wherein said at least one second stream of air is produced and dispensed by least one segmented condenser of said at least one compressor with refrigerated dryer (9, fig. 1), said means for producing and dispensing said at least one first stream of air is at least one air conditioning unit (abstract, fig. 1), and wherein said least one second stream air produced by at least one segmented condenser of said at least one conditioning unit (9, fig. 1).

Claims 1-3, 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Hara (5706664). Hara shows means producing and dispensing at least one first stream of air having a first temperature (35, 33, fig. 1); and means producing and dispensing at least one second stream of air having a second temperature (35, 39, fig. 1), means for automated control of said first and second temperatures (43, fig. 1), said automated control of said first and second temperatures is at least one computer control panel (43, fig. 1, fig. 2), at least one mixing chamber, wherein said

least one first stream of air and said at least one second stream of are mixed create least one third stream having a third temperature (47, fig. 1).

Allowable Subject Matter

Claim 7-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim 11 is allowed.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following patents are cited to further show the state of the art with respect to driers in general: Gustafson (4209914).
